

Conventional Water washing Vs Steam Washing

	Regular Water Wash	Steam Wash
1	Required 200 to 300 lit of water	Required only 15 to 20 lit of water
2	Required chemical for washing	No Chemical required as steam is a natural cleaning agent
3	Leaves water mark if not wipe properly	No water marks as steam is completely dry no traces of water after washing
4	Waste water generates	No Waste water generation
5	Cannot clean the interiors of the cars	Yes it can as its dry so no tension
6	No Sanitization	We all know the Steam ability to clean and sanitize without harsh, environmentally harmful chemicals
7	Technique is not eco friendly	It is completely Eco Friendly technique
