

**Partial List Of The Virtually Unlimited Applications & Surfaces  
Appropriate For Vapor Steam Cleaner Technology:**

acoustical tile	kitchen fryers
acrylic	kitchen mixers
aluminum detailing	kitchen range hoods
appliances	kitchens- most surfaces
area rugs, spot cleaning	laboratory cages
automobile carpet spot cleaning	lamineate surfaces
automobile wheels	latex paint (with extreme care or melting can occur)
automotive cloth and velour upholstery	lawn and patio furniture
automotive detailing- cleaning interior hard surfaces	lawn mowers
automotive door jambs	levelor blinds- non fabric only
automotive engine compartments	light fixtures
automotive floor boards	limestone (sealed and honed only)
automotive rubber floor mats	linoleum
automotive headliners with care	machine and parts cleaning(detailing only)
baby changing stations	marble
baby's nursery	marble floors
back splashes	mattresses
baked-finish cabinets	medicine cabinets (not for unsealed hard wood)
bakery rack detailing (Otherwise use wet steam pressure washer)	metal fences (detailing only)
baseboard heater fins (only light dust on the outside)	metal furniture
bathroom showers, mold and mildew	microwaves, inside and around outside
bathroom tile and grout	mirrors
bathrooms	most children's toys

bathtubs	motorcycles (detailing only)
bbq's, ovens, and grills(detailing only ... large bbq's are better cleaned using wet steam pressure washers)	naugahyde
bed bugs	nylon furniture (not delicate fabrics)
bed frames	Oriental carpets (spot cleaning with care)
bedspreads, sanitizing and disinfecting	outdoor furniture
bicycles	oxidized aluminum surfaces
bird cages	paint preparation (small tasks)
blenders	paint removal (light, small areas, and not enamel/powder coating)
blinds, vertical and horizontal	painted, powder coated surfaces and enamel
boat detailing - most interior hard surface detailing	Persian carpets (spot cleaning with care)
boots, rubber - clean and deodorize	pet areas
brass	pet cages
cabinet facing: laminates, sealed hard wood	pet carriers
car wheel rims	pet's bedding, freshen up and sanitize
carpet chewing gum removal	plastic
carpet spots and areas to help in stain removal	plastic fences(detailing only)
cat scratchers	porcelain fixtures and surfaces
ceiling fans	pots and pans (remove charred build-up underneath)
ceiling tile (non-acoustical)	pure wool carpets (spot cleaning with care)
ceramic	quarry tile (sealed and honed

	only)
ceramic tile	recycling bins (detailing)
chrome fixtures	refrigerator door gaskets, mold around
clogged gas jets in gas ranges	refrigerator door seals, slime on
commercial kitchen appliances (wet steam pressure washers are best for heavy grease buildup)	refrigerators, cleaning
concrete (only sealed and honed interior surfaces)	refrigerators, defrosting
condenser/cooling coils (only light exterior cleaning/detailing. Cleaning between fins requires wet steam pressure washers)	remove & kill algae spots
conveyors, spots and areas (full cleaning requires wet steam pressure washers)	removing rust spots
copper	removing surface mold
counter tops	removing wax from baseboards
cutting boards	resilient floors
deodorize carpets	rubber floor spot and area cleaning
door knobs	recreational vehicles detailing, interiors
door metal rails	screen, metal (detailing)
drapes, heavier	sealed hard wood floors
ducts (using a towel wrapped around a brush)	shower stalls, fiberglass sounds, doors, rails
dust mites	sidewalks - gum spots
dusting plants	sinks
enamel	sliding doors/tracks
entryways (sealed wood, ceramic glazed tile, vinyl)	soap scum

equipment, lawn (detailing)	sports equipment
equipment, clean nooks and crannies	spot cleaning carpets
exercise equipment detailing	stainless steel (detailing)
exhaust hoods, kitchens (using a towel wrapped around a brush. Professional hood cleaning requires a wet steam pressure washer.)	stove tops
faucets	stove, inside and outside
fiberglass	thawing frozen pipes
fiberglass fixtures	tile floors: smooth, non-porous
fireplace, exterior brick	toilet bowls
floor grout	toilet seats
floor mats	toilets, porcelain
floors: most hard floors, carpet spots	tools
food service equipment and table legs	toys
food service exhaust hood filters	trash cans: clean, sanitize, and disinfect
food service kitchen drains: covers/top/underside	travertine tile (sealed and honed only)
food service kitchen drains: kill fruit flies	upholstery: cloth, velour, and leather
food surfaces to help most bacteria	upholstery: spot clean stains
freezers, inside cleaning and defrosting	urinals
garden and hand tools	utility equipment
glass	V.C.T.
glue (most glue spots on tile and most hard surfaces)	veneer cabinets
golf clubs	venetian blinds (non-fabric)
granite	vinyl (spot cleaning)
grout lines (not for apoxy grout or caulking)	vinyl floors
gum removal (with specific models)	wall grout: not for epoxy grout or caulking

hard wood: sealed floors and surfaces	walls, most (not concrete and other porous surfaces)
HVAC equipment (detailing only ... wet steam pressure washers for deeper coil cleaning)	wall-to-wall carpet, spot and area cleaning
ice machines	waterbeds (with care)
Industrial can openers	wax paraffin removal
industrial equipment - detailing only	welding preparation (only detailing)
jewelry	wheelchairs (wet steam pressure washers are suggested)
kennels (for ceramic tile and grout, not for concrete, etc.)	window frames
kill & control allergens on most surfaces	window screens
kill dust mites	window sills (not for use on paint)
kill fleas	windows
kitchen counter tops	wood parquet, sealed
kitchen equipment detailing	work-out room
kitchen exhaust hoods detailing only	yard equipment, small (detailing)
